Every time you end the quiz game, your recent score (the last time you tried) will show the bottom of the app homepage.

Summary

This app uses Auto layout but not storyboard to build whole layout, so it can adapt variable Iphone on different inches in the market.

The structure of this quiz app is simple, due to limited time and short age skills on using new programming language, Swfit, I have not implemented some functionalities, such as “Less time more score”, “Mark Ranking”, “Share outcomes by Facebook or other social media” and so on.
